THE MEMBRANE
KEYBOARD COMPANY

“No Mould” Plastic Enclosures & Housings

- Fully customised service including design, prototype and manufacture.
- Standard preconceived range with options to customise.
- Minimal engineering charges.
- Concept to production in three weeks possible.

In 3 steps the LTP Team will produce the most suitable enclosure for your project.

Step 1 Conception / Design - 1 Week

From Receipt of your initial requirements, LTP's design team will draw and submit several style options of your housing

Step 2 Design ? Prototype: 1 - 2 weeks

LTP's Engineers will produce an exact 3D image of your chosen enclosure as per your requirements. Based on this 3D model the Prototype Department will produce your prototype.

Step 3 Production Manufacture 3-4 weeks

Upon receipt of your prototype approval, your production order is released for manufacturing.

Cost Effective

The technology allows LTP to produce customised plastic enclosures without any tooling costs and is ideally suited to small and medium production quantities.

Flexible

Your enclosure can be produced to meet all your project requirements: shape, size, colour, cut-outs and accessories.
It can follow the evolution of your electronics or mechanics.

Quick Turnaround

With over 25 years experience in designing and producing customised enclosures, LTP can supply a design concept, 3D model, prototype & production of small to medium quantities within an overall lead-time of <5 weeks.
